VirtualBox
Change keyboard layout

Contact: jaume.sanz@upc.edu
Web site: http://www.gage.upc.edu
Right Click on the keyboard symbol
Click on Preferences
Click on Input Method

IBus Preferences

General  Input Method  Advanced

Keyboard Shortcuts
Next input method: <Control>space

Font and Style
Candidates orientation: Vertical
Show property panel: Hide automatically

- Show icon on system tray
- Embed preedit text in application window
- Use custom font: Sans 10

Close
Select the option “Customize active input methods”
Click on "Select Input Method" to show the language list (Click on "Show all Input Methods" to show the full list)
Select your layout. In the example we select UK keyboard.
Once the layout is selected, click on “+ Add”
The new layout should appear on the list.
Left Click on the keyboard symbol
Click on your layout
The keyboard layout symbol should have changed
Acknowledgements

- The ESA/UPC GNSS-Lab Tool suit (gLAB) has been developed under the ESA Education Office contract N. P1081434.
- To Deimos Ibáñez for his contribution to gLAB updating and making the Virtual Machine of this tutorial.
- To Adrià Rovira-Garcia for his contribution to the edition of this material and gLAB updating.
Thank you
